# Project Overview

SheMart is a women-focused fashion e-commerce app designed for a client in Romania through Fiverr.

The app brings handbags, watches, and shoes into one simple shopping experience—from product discovery and favourites to checkout, order tracking, and reviews.

## Problem & Solution

### Problem

Women often shop across multiple platforms to find handbags, watches, and shoes. Product discovery can feel scattered, inconsistent, and time-consuming.

- Fashion categories spread across different stores
- Hard to compare styles, prices, and availability
- Saving favourites and tracking orders feels fragmented
- Lengthy shopping journeys reduce confidence

VS

### Solution

SheMart brings women's handbags, watches, and shoes into one focused mobile shopping experience—from discovery to checkout and delivery.

- Three clear women's fashion categories
- Simple search, filters, and favourites
- Smooth cart and secure checkout flow
- Order tracking and post-purchase reviews

## Target Audience

SheMart is designed for women who want a simple, stylish, and convenient way to discover and shop fashion essentials.

- Age: 18–45 years old
- Gender: Female
- Location: Romania
- Profile: Students, professionals, and fashion-conscious shoppers

# DESIGN THINKING PROCESS

## 01

### Empathize

Understood women's shopping needs, behaviours, and pain points through user-focused research.

## 02

### Define

Turned research findings into clear user needs, priorities, and a focused design challenge.

## 03

### Ideate

Explored practical ideas for simpler discovery, selection, checkout, and order tracking.

## 04

### Prototype

Built the complete app structure, from low-fidelity wireframes to polished high-fidelity screens.

## 05

### Test

Reviewed usability, refined interactions, and improved clarity across the complete shopping journey.

## 16-Day Design Timeline

The SheMart mobile app was designed and completed in 16 days — 9 days ahead of the original 25-day Fiverr deadline.
